MEMORANDUM FOR: Director of Central Intelligence	
FROM : Harry E. Fitzwater Director of Personnel Policy, Planning, and Management	
SUBJECT : Compensation for Overseas Personnel	25X
	•
1. Action Requested: It is requested that you approve the recommendation contained in paragraph 4.	25X
2. Background:	
a. The staffing of our overseas positions is becoming more and more difficult. Some reasons offered by employees have been the inconveniences of overseas living, concern with terrorism, hazards of being identified as a CIA employee, the security of the sponsor's family, career goals of spouses, family reluctance to relocate, educational difficulties, and the higher costs of overseas living. This latter problem more seriously affects the lower-salaried personnel than those at higher grades and salaries.	25X
b. CIA is not alone in having difficulties in staffing overseas positions. The Department of State acknowledged the difficulty by including in the recently approved Foreign Service Act of 1980 certain new allowances such as a Danger Pay Allowance, an Allowance for Posts Requiring Special Incentives, and a Separate Maintenance Allowance. Although we propose to adopt these allowances, where authorized, for CIA personnel stationed overseas, these allowances do not acknowledge the distinction between CIA and Foreign Service employment. Some of these distinctions are terrorism targeted on CIA employees, the stress of covert activity , and the dedication of CIA employees.	25X 25X
c. CIA employees receive the general benefits afforded Foreign Service employees overseas. These presently include such items as quarters allowances, post allowances, transfer allowances, education allowances, and post differentials. These allowances generally compensate for the additional costs of living overseas and are frequently adjusted based upon actual local costs. Many Foreign Service employees, however, receive

25X1

higher salaries than CIA employees, particularly since the passage of the Foreign Service (FS) Salary Scale of 1980. This new schedule results in an average salary increase of 10.16% (ranging from 0.04% to 13.58%) for Foreign Service personnel in addition to the Federal pay raise of 5 October 1980. The additional salary provided for Foreign Service personnel has had a significant negative impact on the morale of Agency employees.

d. The special authorities of the DCI, as authorized under Section 8 of the CIA Act of 1949, would allow the payment of additional or higher compensation if it is determined essential in order to recruit and retain qualified personnel in overseas positions. However, approval of additional or higher compensation should be discussed with the Office of Management and Budget and appropriate Congressional Committees.

e. Compensation for overseas personnel was discussed at an Executive Committee meeting on 12 November 1980. In concluding the meeting, the Deputy Director of Central Intelligence requested that this issue be addressed in two parts. First, he asked for a proposal that would bring the pay of CIA overseas personnel in line with the new FS salary scale in the near term; this paper recommends a proposal to satisfy this requirement. Secondly, Mr. Carlucci requested that a group of appropriate Agency representatives be formed to look at alternatives for longer-range solutions; this report will be submitted separately.

3. Staff Position:

25X1

- a. Attachment 1, an Overseas Compensation Scale, was developed by the Office of Finance, discussed and coordinated with representatives of the Office of the Comptroller, the Directorates of Administration, Operations, and Science and Technology to meet the following objectives:
 - provide compensation comparable with the Foreign Service;
 - o provide an increase in compensation for lowergraded employees to acknowledge the unique and valuable contribution of CIA secretarial and communications employees; and,
 - o include the compensation increase in base pay to increase employee entitlements such as high-three salary for retirement compensation, increased FEGLI insurance coverage, greater compensation in case of accidents or death, and increased premium or overtime pay.
- b. To achieve compensation comparability with the Foreign Service, the Office of Finance compared the FSO/FSS schedules and the GS schedule in effect prior to 5 October 1980. Each GS grade and step

25X1

25X1

25X1

was compared with both the nearest dollar equivalent FSO grade and step and the nearest dollar equivalent FSS grade and step to identify comparability existing prior to the implementation of the new rates of FS pay. The differences at the comparable grades and steps were then computed utilizing the GS and new FS schedule that went into effect on 5 October 1980. This provided us with the amounts required for GS pay at each grade and step to remain comparable with its FS equivalent. This comparison is illustrated in Attachment 2. c. The Foreign Service Act of 1980 provided only a minimum salary increase for many of the lower-graded Foreign Service employees. However, it is our opinion that we cannot exempt our lower-graded employees from a general upgrading of overseas salaries as they perform a broader and more complex range of functions than their Foreign Service counterparts. Therefore, it is proposed that a base salary increase of \$2,050 (the increase required for a GS-7, step 4 to maintain comparability with an FSO-8, step 4) be established as the minimum increase for employees under this system. This \$2,050 minimum applies to the GS-4 through GS-9 grade levels. d. Construction of the Overseas Compensation Scale was begun at the step 4 level of each grade, with the exception of GS-15. The present step 4 salary was added to the amount required to maintain comparability or the \$2,050 minimum. This salary schedule leaves the present system of within-grade increases intact. Salary inreases and within-grade increases under the Overseas Compensation Scale are shown in Attachment 5.		•				• •
